Format -this will be run with 6 drivers, each racing each of the 18 cars in 3 minute segments. Race format will be 3 x segmented races (6 cars in each) with 3 minute heats. The Cars will change lanes after every segment, drivers will stay on the same lane throughout the race and will get a 30 second warm up with each car prior to the segment start, the drivers will then return the new car to the same position on the track where it was placed at the start of the warm up. This way footage will be taken at the end of each 6 segment race. Cars will be identified by their race number. It would be appreciated if we can have 6 marshals for this event to assist in marshalling and changing lanes.
